

Week 8 – Room 1 (Mike & Will)

I am in agreement with @Moo Joon Park when it comes to Predictive Policing. Just based on the premise "predicting crime" ...there is definitely cause for concern regarding the data used in developing the algorithm. During our session today it came up that larger random samples of data may mitigate some of the issues regarding bias based on statistics. However, wouldn't it still depend on where the data is being sampled from?

The following article discusses how robots trained on AI became racist and sexist:
